Journal of Fluid Mechanics Volume 393 **25 August 1999**

M. S. Cramer & S. Park	On the suppression of shock-induced separation in Bethe–Zel'dovich–Thompson fluids	1
S. Berlin, M. Wiegel & D. S. Henningson	Numerical and experimental investigations of oblique boundary layer transition	23
P. Hall & D. T. Papageorgiou	The onset of chaos in a class of Navier–Stokes solutions	59
J. F. Palierne	On the motion of rigid bodies in incompressible inviscid fluids of inhomogeneous density	89
J. R. Chaplin	History forces and the unsteady wake of a cylinder	99
E. Villermaux & C. Innocenti	On the geometry of turbulent mixing	123
S. Lanzoni & M. Tubino	Grain sorting and bar instability	149
J. M. Bruns, H. H. Fernholz, & P. A. Monkewitz	An experimental investigation of a three-dimensional turbulent boundary layer in an 'S'-shaped duct	175
B. M. Woodley & N. Peake	Resonant acoustic frequencies of a tandem cascade. Part 1. Zero relative motion	215
B. M. Woodley & N. Peake	Resonant acoustic frequencies of a tandem cascade. Part 2. Rotating blade rows	241
F. S. Godeferd & L. Lollini	Direct numerical simulations of turbulence with confinement and rotation	257
H. Azuma & S. Yoshihara	Three-dimensional large-amplitude drop oscillations: experiments and theoretical analysis	309
E. D. Wilkes & O. A. Basaran	Hysteretic response of supported drops during forced oscillations	333
P. G. Daniels & A. T. Lee	On the boundary-layer structure of patterns of convection in rectangular-planform containers	357
INDEX TO VOLUME 393		381
